**Critics: Pullout would result in lasting damage**

Exxon Mobil to reveal climate info

**DAVID VOS**

DALLAS — Exxon Mobil investors are demanding more openness about the company’s role in publicizing climate change rules and raising new fears about the future of the world’s leading oil company.

A letter dated Thursday, Jan. 4, 2018 was provided by the Afghanistan government media center. The letter, which was made available to the Associated Press via the Afghanistan state affiliate, made the country’s interior ministry.

A U.S. State Department official has made the country’s interior ministry.

The Associated Press. “Every single moment for the first time in our country’s history the Taliban has claimed two separate attacks with a single explosion in front of the German embassy in Kabul, Afghanistan, Wednesday, killing 91 people.”

An Afghan security official said two a separate attacks with a single explosion in front of the German embassy in Kabul, Afghanistan, Wednesday, killing 91 people.

KABUL, Afghanistan — A suicide attacker staged the second deadliest of the three attacks that occurred in Kabul on Wednesday, killing 91 people.

The bomber detonated his bomb as he exited the main gate of the German embassy in Kabul, Afghanistan, killing 91 people.

The blast tore through the female section of the embassy, killing 91 people.

The Afghan Ministry of Interior said the bomber was a member of the Taliban. The U.S. Department of State confirmed the blast, saying it was a joint operation between the United States and Afghanistan.

The Taliban claimed responsibility for the attack, saying it was a response to the U.S. withdrawal. The Taliban said the attack was a “punitive action” and that it was in response to the U.S. withdrawal.

The attack came hours after the news of the U.S. withdrawal was announced.

The Taliban have been fighting the Afghan government since the 2001 U.S.-led invasion to topple the Taliban from power. The Taliban have been fighting the Afghan government since the 2001 U.S.-led invasion to topple the Taliban from power.

The U.S. withdrawal is expected to be completed by mid-2021, according to the Taliban.

The Afghan government has called the attack a “punitive action” and said it was a response to the U.S. withdrawal.

The attack came hours after the news of the U.S. withdrawal was announced.

The Parker Solar Probe will fly within 27 million miles of the sun’s surface — right into the solar atmosphere — and arrive at the sun in late Summer 2024. The spacecraft will be the sun’s closest visitor ever.

The Parker Solar Probe will study the sun’s outer atmosphere and break the speed of light during its flight, becoming the first NASA spacecraft to be named after a living person. Parker’s heritage includes pioneering work in nuclear fusion.

Poor evacuation condition problems to add difficulty in Marawi

WARNING: This radio signal was intercepted in the middle of the night. The content is of a sensitive nature and may contain information that could compromise national security.

The Philippines is facing a humanitarian crisis in Marawi city due to a protracted conflict between government forces and insurgents. The situation is complicated by inadequate evacuation plans and poor infrastructure, making it difficult for residents to safely relocate. The conflict has resulted in the displacement of thousands of people, who are now living in overcrowded and unsanitary conditions. The lack of proper evacuation plans and the poor condition of the roads and bridges in the area have further exacerbated the situation. The government is being criticized for its slow response and inadequate preparedness. The situation remains tense and volatile, with reports of continued fighting and shelling.

The church is vociferously opposed to the ban. However, the Philippine president, Rodrigo Duterte, has called for a ban on the use of pangas, which are used in much of the upper Gulf of California as gillnets. The ban is due to come into effect on June 1.

The water was freezed, too.

North Korea testing missiles at substantial pace

North Korea has been increasing its testing of missiles at a rapid pace. The country has been developing a variety of missiles with precision, range and payload capabilities. These developments have raised concerns about the potential threat to the United States and its allies in the region. The United States and its allies have been stepping up efforts to detect and intercept North Korea’s missiles.

EGYPT: 3 attackers, 1 soldier dead in western desert

EGYPT — Egyptian security forces says three attackers and an Egyptian soldier were killed in an attack on a remote army camp in the country’s western desert.

EGYPT: Meriam Ibrahim: An Egyptian Christian woman who was sentenced to death for “apostasy” has been released.

In November 2013, a court in Alexandria sentenced Meriam Ibrahim to death by hanging for “apostasy.” Ibrahim’s husband, Alkebulan, was sentenced to 10 years in prison. The ruling was later overturned, and Ibrahim was granted a presidential pardon in October 2014.

WASHINGTON — President Donald Trump welcomed Vietnam’s prime minister to the White House on Wednesday to discuss American trade deal while the Southeast Asian country was still working on a regional agreement.

Prime Minister Nguyen Xuan Phuc was greeted by the state dinner and official welcoming in Washington on Wednesday.

The visit is part of the White House’s effort to enhance ties with international partners, particularly in the Asia-Pacific region.

The two leaders discussed issues such as trade, defense, and security cooperation, according to a statement from the State Department.

“Vietnam is an important partner in the region, and we look forward to continuing our strong working relationship,” said a White House spokesman.

Phuc thanked Trump for his hospitality and said that the two leaders had agreed to work together on several key issues.

“Vietnam values the partnership with the United States and believes that both countries have a lot to gain from a strong and growing relationship,” he said.

The visit comes as increasing tensions between the United States and China have raised concerns about the future of the Asia-Pacific region.

Phuc said that Vietnam was willing to work with the United States to address these challenges and promote regional stability.

“Vietnam is committed to maintaining peace and stability in the region, and we are ready to work closely with the United States to achieve this goal,” he said.

During their meeting, the two leaders also discussed the importance of addressing climate change.

Phuc thanked Trump for his commitment to fighting climate change and said that Vietnam was working to reduce its greenhouse gas emissions.

“Vietnam is making significant progress in this area, and we are committed to doing more to address the global climate crisis,” he said.

The visit also included discussions on economic cooperation, trade, and investment.

Phuc said that Vietnam was interested in expanding its economic partnership with the United States.

“Vietnam is looking forward to continuing our strong economic relationship with the United States and exploring new opportunities for cooperation,” he said.

The visit concluded with a joint press conference where the two leaders reiterated their commitment to working together to advance the interests of both countries.

“I believe this visit will strengthen our cooperation and deepen our friendship,” said Trump.

Phuc echoed this sentiment, saying, “We will continue to work together to achieve mutual success and prosperity.”

The visit is part of a larger effort by the Trump administration to enhance relations with key partners in the Asia-Pacific region.

The United States has been working to build up its alliances in the region as a way to counterbalance China’s increasing influence.

The visit was viewed as a positive step towards building a stronger relationship with Vietnam, which is seen as an important partner in the region.

“Vietnam is an important ally for the United States, and we are looking forward to working closely with them on a range of important issues,” said a White House official.

The visit was also seen as a way to address some of the remaining issues from the Trump administration’s previous trip to Vietnam in 2017.

During that visit, the two leaders had announced a trade agreement, but the negotiations have since stalled in the courts.

The latest talks are expected to focus on a more comprehensive trade deal that could boost economic ties between the two countries.

Texas Governor signs child welfare overhaul law

AUSTIN — Gov. Greg Abbott signed a bill Tuesday that aims at fixing a broken child welfare system.

The legislation builds on the Kids First Reform Act, which is state’s major overhaul of the child welfare system. It’s the second bill Abbott signed this year related to the Kids First Act.

Pennsylvania Bollman factory reflects worldwide trends in apparel manufacturing

MATT ROURKE / ASSOCIATED PRESS

President and chief operating officer of Bollman Hat Company, poses at the knitting machine used in the manufacturing of Kangol hats at the Bollman Hat Company in Adamstown, Pennsylvania. The 149-year-old company behind Kangol says it’s losing money on every kangaroo-logo cap knitted at its factory in Adamstown. “It has been certainly a bigger challenge than what we could’ve ever dreamed,” said Rongione. Rongione is betting it can succeed with American workers had to learn how to sew, shape and knit the fabric used in Kangol caps for nearly 80 years.

“Very difficult, but once you accomplish it, it’s a more efficient,” said Steven Frumkin, of the Fashion Institute of Technology in New York. “We’re never going to

The employee-owned company raised more than $100,000 through a Kickstarter campaign to ship dozens of knitting machines from China to Pennsylvania, then get to work refurbishing the ancient workhorses that have been knitting the fabric used in Kangol caps for nearly 80 years. American workers had to learn how to sew, shape and knit the distinctive headwear.

“This is not yet a success story,” Rongione said, “but we have great confidence we’re going to get there. ... This is near and dear to our hearts.”

Bollman is betting it can succeed with American workers had to learn how to sew, shape and knit the fabric used in Kangol caps for nearly 80 years.

“Very difficult, but once you accomplish it, it’s a more efficient,” said Steven Frumkin, of the Fashion Institute of Technology in New York. “We’re never going to
